

DESIGN INTENT

ROAD WARRIOR™

TECH SPECS

COVERSTOCK
R2S™ DEEP Pearl

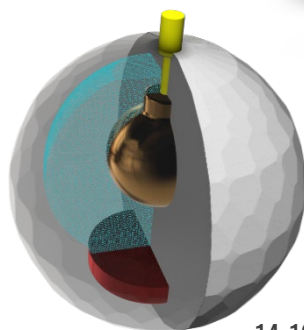

WEIGHT BLOCK
Inverted Fe²™ A.I. Core

FACTORY FINISH
Power Edge™

BALL COLOR
Sapphire / Steel

FLARE POTENTIAL
Medium-High

FRAGRANCE
Peppermint Patty

14-16 lb.

LBS	RG	DIFF
16	2.55	0.045
15	2.55	0.045
14	2.55	0.045
13	2.58	0.047
12	2.64	0.037

12, 13 lb.

The Road Warrior keeps dry lanes in check with the addition of R2S DEEP Pearl to the series. R2S DEEP is cleaner through the front compared to the flagship R2S formula. This yields more energy conserved at the pocket with more overall angle through the pins. Power Edge polish preserves the underlying texture created early in the finishing process, but still creates the length needed every shot. This generates a vast amount of backend no matter what conditions it's used on. Today, benchmark reliability meets amplified inertia with the biggest revolutionary advance to outer core technology in 30 years of Storm history. This medium-high RG and differential infusion provides a balanced amount of flare potential that makes the length and shape of each shot as reliable as the next. A.I. Core technology is now offered across all weights so the benefit of "Amplified Inertia" can be experienced no matter what weight you use.
