

# TREND™ 2

## SETTING TRENDS DAY BY DAY

For a ball to be emblazoned with Jason Belmonte's insignia, you know it must be special. After all, his 13 majors and multiple PBA Player of the Year accolades is no small feat. This man knows what he's talking about, so we've enlisted his help in designing some of the highest performing balls on the market, balls which reflect his career.

## ALL THINGS NEW

You've DRIVEN your way through TIMELESS ball reaction with PRO-LIKE MOTION, now it's time to set another TREND with the Trend 2. As a competitor, we rely on gaining true feedback from each shot. Relying on the signals given from how the ball reads the lanes becomes imperative. Make no mistake, the type of ball used is equally critical. Trend 2 will produce a visible, discernable motion that bowlers from all skill levels and styles will appreciate.

### TECHNICAL DATA

**COVERSTOCK**

*NRG™ Hybrid Reactive*

**WEIGHT BLOCK**

*Piston™ LD Core*

**FACTORY FINISH**

*1500-grit Polished*

**BALL COLOR**

*Indigo / Space Black / Rosé*

**FLARE POTENTIAL**

*Medium*

**FRAGRANCE**

*Orange Meringue*

"Of all the Signature™ line balls Storm and I have created, Trend 2 has us the most excited. With a stronger cover and a redesign of the weight block, we have created an absolute monster for any style of player," said Jason. "Trend 2 will give you the ability to move deeper on the lane without losing entry angle into the pocket. If you are in need of throwing that big couple games, Trend 2 is going to have your back."

The Piston Core has adapted to the ever-changing environment we all endure. We've lightened the density of the weight block to create a higher RG with lower differential. Enter: The Piston LD Core. This provides the player with more continuation off the end of the pattern with the core dynamics concentrated in this range. Differentials in this class allow the core to stay in constant motion without "locking up" or going forward too quickly.

The sleek styling of the gorgeous orange, purple, black NRG hybrid cover is just a hint of the power contained. The factory polished finish helps the Trend 2 glide effortlessly through the front part of the lane, with extra grip on the backend where it counts. When the fronts are starting to dry out and you need explosive backend the Trend 2 is unquestionably the right weapon for the job.

Storm – We are "The Bowler's Company™."
